Evening Brief

Date: July 31st, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 10 fires for 1 acre / 2928 acres Large Fire Growth

Weather:

... Drier and Warmer weather Returns Next Week ...

Monsoonal moisture lingers in the eastern portion of the Great Basin Monday with scattered showers. Otherwise a return to seasonable warmth and dryness from west to east this week with high pressure shifting back to the south.

A weak cold front will brush the Central Idaho Mountains midweek with clouds and isolated light showers. Further south it will be drier with southwest breezes of 15-25 mph gradually drying out most of Nevada and Utah. By the end of the week, another cold front will move through Idaho with increasing clouds and cooler temperatures, and possibly some light showers, while slightly cooler, but dry conditions persist south of the I-80 corridor.

Fuels/Fire Potential:

.... Fuels and Fire Behavior Advisory in effect for Idaho, and Northern Portions of Both Utah and Nevada and Along the Sierra Front ...

Large fire potential will temporarily decrease into early next week with deep moisture across the Great Basin. This moisture will at least temporarily lower fire danger in some areas for several days or longer.

However, drier conditions will return to western and southern areas by early this week. It will take several days of drying to overcome the recent rainfall and prolonged high humidity in most areas. Fuels across western Nevada will be the first to dry back to near critical levels by midweek, while areas further north and east will take longer to recover during this "half-time" break in our fire season.

Resources:

Aviation within the Great Basin

- 0 VLAT, 1 LATs, 0 CL-415
- 25 SEATs, 0 FB, 9 AA, 1 ASM, 1 LP
- 9 Type 1 Helicopters / 9 Comm.
- 7 Type 2 Helicopters / 6 Comm.
- 18 Type 3 Helicopters / 11 Comm.

Crews Committed within the Great Basin

- 12 IHCs / 1 Available IA / 1 R&R
